

concerning the alleged microscopic examination of honey, but the editor of another department of the *Journal* read it, and deeming it an item in which honey producers would be interested, he reduced it to a short paragraph, handed it to the printer, and it was put in type without this editor's knowledge.

The truth brought out by the Union shows just the opposite of the reported sensation. The editor of the *Journal of Agriculture* adds :

The real facts show how imaginative a reporter may be, and further show that an expert microscopist has been unable to detect an evidence of adulteration in any one of the twenty specimens of honey indiscriminately collected in St. Louis, all of which is to the credit of honey producers, and of retail dealers in St. Louis. We are gratified at so pleasant an outcome to the matter, which had its origin in a grievous misstatement of facts on the part of a reporter.

Just for a moment consider the facts in the case : A "druggist" examined a score of samples of honey, but did not find any adulterated ! This he stated at a meeting of microscopists. The sensational-scribbler reported that the St. Louis Society of Microscopists examined several hundreds of samples, and found the majority of them adulterated ! Could lying be more pre-meditated and pernicious ?

Election of Officers.

At the last election all the old officers were re-elected by over 100 majority. While the General Manager would have been pleased to have seen a new set of officers elected—just to exhibit an interest in the organization—still he would also say that the President and Vice-Presidents have all worked so harmoniously for the general welfare, that it would be next to impossible to find those who would have done better, and we presume that the members of the Union concluded that they could not any better show their appreciation of what has been accomplished in the past, than by re-electing them.

Change of Time for Paying Dues.

It was suggested by several members that the time for paying dues should be changed from July to January, when members would not be too busy to give it attention, and also to take some time to get others to join—July being the most hurrying time of the year. Mr. E. France, when urging the change, said : "I am willing to pay another dollar on Jan. 1, if the time can be changed." This was submitted to the members through the AMERICAN BEE JOURNAL, and all were asked to send a Postal Card who voted against the change. Only three votes against it being received, after repeated notices, the motion was declared to be carried, and the time is accordingly changed.

Financial Statement.

From July to Dec. 1888.

Balance as per last report.....	\$258.27
Received from 239 members at \$1.00.....	239.00
Donations received.....	97
	—
Paid Judge Williams, attorney.....	\$150.00
Postage, printing, stationery, etc.....	68.86
	—
Balance cash on hand Dec. 15, 1888.....	\$279.33

Balance cash on hand Dec. 15, 1888..... \$279.33

LIABILITIES.—On the Rich lawsuit the costs are about \$1,000, which must be paid as soon as the judgment is rendered, and for which bonds have been given, if the judgment is adverse. The costs on the Arkadelphia case cannot at present be determined.

Concluding Remarks.

Away across the Oceans the Union has been applauded, not only in Europe, but also in Australia. The Editor of the *Australasian Bee Journal*, after giving a resume of the last report of the General Manager, adds : "Long may the Union flourish."

What the Union has done in the past is a guarantee for the future. It may not always triumph over prejudice, envy and ignorance, but it will defend the pursuit, and uphold the right. It is for bee-keepers to say whether it deserves both their moral and financial support or not. If it does, they should render both in unstinted measure. It is to the interest of every individual engaged in the pursuit of bee-culture to do so.

Do the members ever think of what a **power** there is in an organized defense ? and what a powerful defense it is, when those engaged in a pursuit combine and employ the very best legal talent which can be had—and plenty of it—and planting their feet squarely upon the constitution of Freemen—in this "Land of the Free and Home of the Brave"—they demand the rights guaranteed to every "honest son of toil" by that *magna charta* of American liberty and independence—the Constitution of the United States !!!

It is not only the **privilege** of apiculturists to belong to such a "Union" for defense—but it is a **high honor**. Like the Royal Huzzars of history, the Union has never been beaten ! **Victory** has perched upon its banner in every contest so far undertaken in the defense of the rights of its members ! This is, of course, attributable to the care exercised in canvassing the cases before deciding to defend them ; to make sure that they are **RIGHT** before going ahead with them ! For if not **right**, it would be better to be beaten than to be victorious.

In submitting this my Fourth Report, I desire to say, as before, that I have done to my utmost all that I could for the success of the Union, and am both ready and willing to give place to my successor as soon as elected.

T. G. NEWMAN, General Manager.

Honey and Beeswax Market.

CHICAGO.

HONEY.—We quote : White clover 1-lbs., 18@19c.; 2-lbs., 16@17c. Good dark 1-lbs., 15@16c.; 2-lbs., 13c. Buckwheat 1-lbs., 14@15c.; 2-lbs., 12@13c. Extracted, 7@8c. depending upon quality and style of package. Receipts increasing, but demand still limited. Stock is not selling as freely this season as a year ago.

BEESWAX.—22c.

Nov. 13. S. T. FISH & CO., 189 S. Water St.

CHICAGO.

HONEY.—It is selling fairly well at 18c. for best 1-lbs., very fancy lots have sold at 20c. Dark and yellow comb sells slowly at 13@16c. Extracted, 7@8c., according to quality and style of package. The stock of best comb honey is light.

BEESWAX.—22c.

Nov. 22. H. A. BURNETT, 161 South Water St.

MILWAUKEE.

HONEY.—We quote : Fancy white 1-lbs., 18@20c.; 2-lbs., 16@18c. Good dark 1-lbs., 16@18c.; 2-lbs., 15@16c.; fair 1-lbs., 12@14c. Extracted, white, in kegs and ½-barrels, 8@9c.; amber in same, 7@8c.; in pails and tin, white, 9@9½c.; in barrels and half-barrels, dark, 6@6½c. Market steady and supply ample for the moderate demand, but present values have a tendency to restrict general consumption.

BEESWAX.—22c.

Oct. 25. A. V. BISHOP, 142 W. Water St.

NEW YORK.

HONEY.—We quote : Fancy white 1-lbs., 15@17c.; 2-lbs., 14@16c. Fair white 1-lbs., 14@16c.; 2-lbs., 13@14c. Extracted, white, 7@8c.

BEESWAX.—23c.

Sep. 17. THURBER, WHYLAND & CO

NEW YORK.

HONEY.—We quote : Fancy white 1-lbs., 16@17c.; 2-lbs., 13@14c. Fair white 1-lbs., 14@15c.; 2-lbs., 11 to 12c. Buckwheat 1-lbs., 16@12c.; 2-lbs., 10c. White extracted, 8@9c.; buckwheat, 6@7c. Demand good for white 1-lbs. and buckwheat 1 and 2 lbs., of which the stock is light. Good stock of white 2-lbs., with but little demand.

BEESWAX.—22c.

Nov. 24. HILDRETH BROS. & SEGELENKIN, 28 & 30 W. Broadway, near Duane St.

SAN FRANCISCO.

HONEY.—White 1-lb. sections, 12@13c.; 2-lbs., 12@14c.; amber, 8@10c. Extracted, white, 6@7c.; light amber, 8c.; amber and candied, 5½@6½c. For comb honey the demand is light ; for extracted it is good, and market firm.

BEESWAX.—Dull at 18@22c.

Nov. 15. O. B. SMITH & CO., 423 Front St.

DETROIT.

HONEY.—Best white 1-lbs. 18@18c. Supply is not large, but equal to the demand.

BEESWAX.—22c.

Dec. 12. M. H. HUNT, Bell Branch, Mich.

CINCINNATI.

HONEY.—We quote : Extracted at 5@8c. per lb. Best white comb honey, 12@16c. Demand slow.

BEESWAX.—Demand is good—20@22c. per lb. for good to choice yellow, on arrival.

Dec. 17. C. F. MUTH & SON, Freeman & Central Av.

KANSAS CITY.

HONEY.—Choice 1-lb. sections, 18c.; dark 1-lbs., 14c.; 2-lbs., 16c.; dark, 13c. White extracted in 60-lb. cans, 8c.; amber, 7c.; in barrels and kegs, 5@6½c. Demand good, prices steady, and stock fair.

BEESWAX.—None in market.

Sep. 27. HAMILTON & BEARSS, 514 Walnut St.

NEW YORK.

HONEY.—We quote : Fancy white 1-lb. sections, 17@18c.; 2-lbs., 14@15c. Fair 1-lbs., 14@15½c.; 2-lbs., 11@12c. Extracted, fancy white clover, 7@8c.

California white in 60-lb. cans, 8c.; light amber, 7c.; in same cans, 7½c.; amber, 7½c. Buckwheat in kegs and barrels, 5@6½c. Cuban, in barrels and ½-barrels, 6½c. per gallon.

Sep. 26. F. G. STROHMEYER & CO., 122 Water St.

BOSTON.

HONEY.—We quote : Best white clover 1-pounds, 17@18c.; best 2-lbs., 16@17c. Extracted, 6@8c. The sales are good, and indications are that all the honey in the country will be sold by Feb. 1.

Dec. 12. BLAKE & RIPLEY, 57 Chatham Street.

KANSAS CITY.

HONEY.—White 1-lbs., 16@17c.; fair, 14@15c.; California white 2-lbs., 14@15c.; amber 2-lbs., 12@13c.

BEESWAX.—None in the market.

Dec. 11. CLERMONT, CLOON & CO., cor 4th & Walnut.

ST. LOUIS.

HONEY.—We quote : Extracted in barrels, 5@6c. according to quality ; in cans, 7@8c. Comb, 12@15c. Prices firmer on account of scarcity, though the demand is not great.

BEESWAX.—21c. for prime.

Oct. 17. D. G. TUTT & CO., Commercial St.

SAN FRANCISCO.

HONEY.—We quote : Extracted, white, 6½ cents; light amber, 6@6½c.; amber, 5½c. Comb, white 1-lbs., 13@14c.; 2-lbs., 13c. Light amber 1-lbs., 12@13c.; 2-lbs., 11@12c. Demand very active for extracted, and fair for comb honey.

BEESWAX.—20@21c.

Protecting hives from heat, and cool nights.	Stinging bees, 613.	Jewett, 617	Yellow fever in Florida, 757	
85	Stinging the cappings of cells, 598.		Yellow-jackets, 757	
Pure bees are best.	Shuck, 614.	Miller, 631	Young, Ivar S., 755	
541	Strong combs, 837.	Miller, 607	Young queens, 757	
Pure Italian bees.	Strong colonies.	Gifford, 444	• • •	
Armstrong, 707	Stung by bees.	Miller, 620		
Campbell, 572	Sugar and honey used.	740		
Pure-mated queens.	Sugar from honey, 451.	Alley, 371		
454	Sugar-producing tree.	Proxmire, 184 — Poppleton, 325		
Putting bees into cellars, 20.	Supers.	Peck, 244 — Cullinan, 339		
Doolittle, 764 — Harrison, 791.	Superseding queens, 306.	Lyman, 243		
Putting bees out into winter quarters.	Surplus stories.	Poppleton, 471		
Atwater, 26 — Le Favre, 368.	Swarm-catchers, 275.	Dunlap, 125		
Putting sections on the hives.	Stewart, 459.	Graden, 317 — Morrison, 429 — Manum, 420 — Hachenberg, 520		
Smith, 153.	Swarming, 23, 38, 406, 650, 694, 747.	Thornton, 74 — Hodges, 124 — Maley, 157 — Irwin, 157, 208 — Rogers, 185 — Hand, 254 — Pond, 297 — Duff, 340 — London, 358 — Graves, 384 — Loveland, 394 — Curlee, 444 — Demaree, 456, 633 — Anderson, 459 — Poindexter, 504 — Latham, 536 — Smith, 781		
Puzzling colony.	Swarm on a man's hat.	Reese, 299		
Doolittle, 775	Swarming out.	Ferree, 133		
Mathews, 28	Syrian bees.	Guenther, 261 — Mahin, 328 — Syrio-Albino bees.	Meeker, 61	
Quality of winter bee-food.	Taking lessons in bee-keeping.			
Queen-cages.	Taxing bees.	Davis, 189		
Queen-cells that do not hatch.	Temperature of bee-cells.	Hastings, 12 — Crouley, 171 — Hand, 251 — Beath, 202 — Potter, 204		
Queen-excluding honey-boards, 150, 263, 422, 570 — Trumper, 43 — Heddon, 330 — McIntyre, 444 — Kruschke, 584	Temperature when bees fly.	67		
Queenless colonies, 380, 435 — Graves, 384 — Stith, 504, 602 — Hutchinson, 521 — Greiner, 538 — Wendelken, 556	Test of foul brood.	Dawson, 570		
Queen-lessons in government.	Texas honey-plants.	Bell, 675		
Hachenberg, 411.	Thatching (poem).	Winthrop, 707		
Queens from the South.	Theory and practice of bee-keeping.	Tuff, 498		
Queens laying in royal cells and sections, 6, 550 — Hubbard, 613.	Thin foundation for comb honey.	Sage, 595		
Doolittle, 630	Three-sided hive.	Chalmers, 340		
Queen that stings her rival.	Tiering up, 358, 613 — Cullinan, 403 — Gifford, 444 — 652 — Doolittle, 601	Atwater, 208 — Avery, 706 — Babb, 806 — Hill, 313		
Questions for replies.	Toronto honey exhibit.	Demaree, 827		
Hewett, 42, 120 — Feathers, 120.	Transferring bees.	Reese, 299		
Stewart, 120	Uncapped sections of honey.	Loveett, 517		
Race between pigeons and bees.	Uncapping combs for extracting.	Davis, 630		
Races of bees, 780.	Uncle Sam's national flower.	843		
Lyman, 532	Uneasy bees in the cellar.	Cissman, 92		
Rearing brood.	Uniting colonies.	Graden, 317 — Harrison, 731 — Robbins, 796 — Woodward, 807		
Rearing pure bees.	Uniting hybrids and Italians.	Whitmer, 125		
Hearing queens—Higgins, 57 — Doolittle, 35, 323 — Ford, 139 — Poppleton, 248 — Crouse, 252 — Pond, 297 — Barrows, 310 — Johnson, 330 — Shuck, 344, 443 — Evans, 349 — Demaree, 455 — Balch, 470 — Teft, 556 — Alley, 569 — Clark, 606.	Unknowns in bee-keeping.	Hicks, 56		
Records of queens.	Uses of honey.	660		
Removing sealed larvae.	Veil and gloves.			
Shuck, 443	Ventilation, 22, 707.	Tyrrel, 25 — Holtermann, 152 — Stevens, 188 — Hand, 251 — Thiemann, 263 — Uri, 553.		
Removing surplus honey.	Wax adulteration.	Urle, 451		
Harrison, 714	Wax-cakes.	499		
Removing the queen to secure more honey.	Wax-secretion, 325.	147		
Heddon, 402 — McLean, 457.	Weak colonies.	Gerry, 439		
Reproduction of the honey-bee.	Weather and crops.	Hubbard, 339		
Graves, 217.	Weeds.	564		
Rhode Island aparian exhibits.	Welcome apairy.	732		
Rich bee-lawsuit.	What ailed the bees?	Bates, 336 — Barney, 595 — Beath, 202 — Billings, 444 — Baudensperger, 59 — Barlow, 125 — Bradford, 45 — Barnard, 440 — Barnhart, 200 — Barrows, 301 — Barwells, 492 — Batur, 203 — Bates, 614 — Barney, 595 — Beath, 202 — Becker, 476 — Bell, 1, 62, 157, 317, 501 — Barber, 2, 149 — Barber, Chas.
